QR CODE CONFIGURATION

- 1 Open the OzoLife App. Click "Me" >> "Home Management" >> "Create a home". You can then customize the home name and related settings.

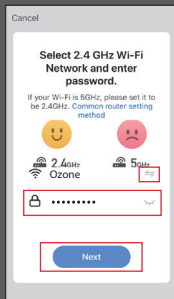

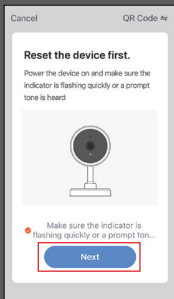

QR CODE CONFIGURATION

- 2 Click "Add Device" or "+", and then select "Video Surveillance" >> "Smart Doorbell" to add camera.

QR CODE CONFIGURATION

- 3 Switch on and reset the camera until the status indicator starts flashing quickly or a prompt tone is heard, and then click "Next". Then input your WiFi's password and click "Next". Click " " to change network.

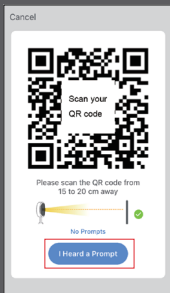

Note:

- 1) Camera only supports 2.4GHz WiFi network.
- 2) The number of bits in the SSID and password of the router should not exceed 24 digits.

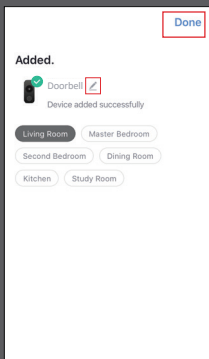

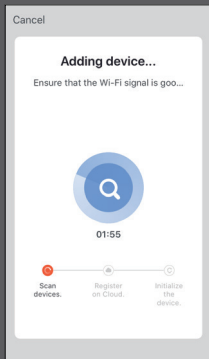

QR CODE CONFIGURATION

- 4 In this interface, you should scan the QR code in your phone with the camera, when the camera comes out "dong dong dong". And you can complete the configuration in about 30s.

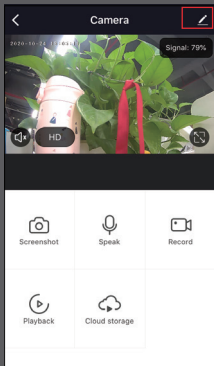

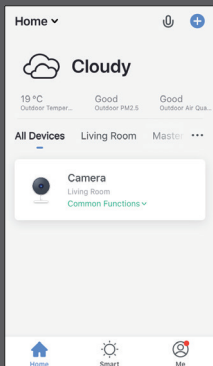

QR CODE CONFIGURATION

- 5 When connecting, you should make sure your router, mobile and camera are as close as possible. When camera is added successfully, click "Done". You can also customize the camera's name.

SETTING

In the "Smart Camera" interface, click () to set the common camera functions.

FUNCTION

REMOTE WAKE-UP

The camera will be in a sleep mode to save power; you can have a preview in the App.

FULL-DUPLEX AUDIO

You can see and hear conversations on the App through the camera.

PIR

When the camera detects someone stopping by, it sends an alarm message to your mobile phone.

LOW BATTERY ALARM

You can set a low-battery alarm threshold in your phone App. The threshold is set to a minimum of 10% and a maximum of 50%. When the battery power of the camera becomes lower than the set threshold, the App instantly sends a reminder.

RECORD

Records every movement on the SD card or on the Cloud Storage Service.

DAY & NIGHT

Powerful night vision means no interruptions, even in complete darkness.

FUNCTION

DAY

NIGHT

Q: The device cannot be previewed properly?

A: Check whether the device is connected to the network. Place the device close to the router, and if it is still not working, reset the device and add it again.

Q: Why is it still in the list of devices after resetting?

A: The reset button only resets the network configuration of the device, but cannot change the configuration on the App. To remove the device, it must be deleted from the App manually.

Q: How to move the camera network to another router?

A: First remove and reset the device on the App and then configure the device again using the App.

Q: Why doesn't the device identify the SD card?

A: It is recommended to plug in the SD card after a power cut. Confirm whether the SD card is normally available and is in FAT32 format. The TF card can't be identified when the internet connection is fluctuating.

Q: Why I can't get the notifications on my mobile App?

A: Please confirm that the App has been running on the phone, and the relevant reminder function has been opened; message notification and authority confirmation in the mobile phone system have been opened.

WARRANTY

Customer Name:

Customer Contact No.:

Purchase Date:
